Contents Volume 98

Vol. 98. No. 1

Pricing in revenue management for multiple firms competing for customers
Y. Dai, X. Chao, S.-C. Fang and H.L.W. Nuttle 1

The tale of two research communities: The diffusion of research on productive efficiency
F.R. Førsund and N. Sarafoglou 17

Supply network dynamics as a source of new business
A.-P. Hameri and A. Paatela 41

A framework of ERP systems implementation success in China: An empirical study
Z. Zhang, M.K.O. Lee, P. Huang, L. Zhang and X. Huang 56

Scheduling a single batch processing machine with arbitrary job sizes and incompatible job families
S.-G. Koh, P.-H. Koo, D.-C. Kim and W.-S. Hur 81

A simple recovery strategy for economic lot scheduling problem: A two-product case
L.C. Tang and L.H. Lee 97

Errata to "A robust optimization model for stochastic logistic problems"
A. Yasar 108

Diary of Events 110

Vol. 98. No. 2

Foreword
J.A. Ceroni and S.Y. Nof 113

Decentralized control of cooperative and autonomous agents for solving the distributed resource allocation problem
P. Anussornnitisarn, S.Y. Nof and O. Etzion 114

Adaptive genetic algorithm for lot-sizing problem with self-adjustment operation rate
N.V. Hop and M.T. Tabucanon 129

An integrated distribution routing model in multi-supply center system
H.-S. Hwang 136

Costing RAM design and test analysis model for production facility
H.-S. Hwang 143

doi:10.1016/S0925-5273(05)00180-5

A distributed dispatching method for the brokerage of truckload freights
K.H. Kim, W. Jun Chung, H. Hwang and C. Seong Ko 150

An analysis of the end-of-aisle order picking system: Multi-aisle served by a single order picker
S.-G. Koh, H.-M. Kwon and Y.-J. Kim 162

Optimal design of rack structure with modular cell in AS/RS
Y.H. Lee, M. Hwan Lee and S. Hur 172

Architectures, methods and tools for enterprise engineering
K. Mertins and R. Jochem 179

Achievement assessment for enterprise resource planning (ERP) system implementations based on critical success factors (CSFs)
A.Y.T. Sun, A. Yazdani and J.D. Overend 189

A heuristic algorithm for a multi-product dynamic lot-sizing and shipping problem
W.-S. Lee, J.-H. Han and S.-J. Cho 204

Economic statistical process control for multivariate quality characteristics under Weibull shock model
S.F. Yang and M.A. Rahim 215

Development of a flexible and programmable parts feeding system
M.L. Tay, P.S.K. Chua, S.K. Sim and Y. Gao 227

A new approach to job shop scheduling problems with due date constraints considering operation subcontracts
D. Chung, K. Lee, K. Shin and J. Park 238

Recent network design techniques using evolutionary algorithms
M. Gen, A. Kumar and J. Ryul Kim 251

Information behavior in the determination of functional specifications for new product development
K. Ishii, T. Ichimura and I. Mihara 262

Vol. 98. No. 3

Flexibility of manufacturing systems, strategic change and performance
F.J. Lloréns, L.M. Molina and A.J. Verdú 273

Optimal inventory policy with noninstantaneous receipt under trade credit
L.-Y. Ouyang, J.-T. Teng, K.-W. Chuang and B.-R. Chuang 290

The role of elasticity in supply chain performance
B. Hull 301

Suppliers capability and price analysis chart
K.L. Chen, K.S. Chen and R.K. Li 315

Applying possibilistic linear programming to aggregate production planning
R.-C. Wang and T.-F. Liang 328

Diary of Events 342
